

The finest alternative

Find out about the most
advanced sewer repair mortar in
this brochure.

Sewperior CAC

The last sewer repair mortar you'll
have to use.

Introduction

Si Powders is proud to introduce a new and exciting range of sewer repair products. Ranging from the standard, proven original all the way to specialized products to suit your project needs, Si Powders **Sewperior CAC** has got you covered.

Developed to outperform the competition time and time again, **Sewperior CAC** has proven that it will be the last sewer repair mortar you need to use.

As sewage and industrial waste becomes more and more concentrated, chemically resistant materials are required to avoid problems such as corrosion.

Sewperior CAC features a 100% calcium aluminate system that provides an extremely resistant coating which is suitable for long term solutions.

The lack of free lime and ingredients sensitive to sulphates provides high resistance to sewage, extraordinary abrasion resistance and high resistance to biogenic corrosion by sulphuric acid makes **Sewperior CAC** the ideal repair material.

Performance

Sewperior CAC comes in three distinct versions to suit your project. Following strict quality control procedures has enabled Si Powders to produce a consistently high performing product that has been independently tested by the University of Sydney and abroad to high appraisal.

Age	Sewperior CAC	Sewperior Trowel	Sewperior CAC+
1 day	>40	>40	>50
7 day	>60	>60	>60
28 day	>75	>70	>80

* 50 mm cubes to AS1478 at 23°C (+/-2°C)

The finest alternative
